## **SLA 3D Printing: The Ultimate Guide | All3DP**

Because 3D printing can make parts directly from a digital file without tooling, it is a viable way to build production volumes of parts in quantities without significant investment. 3D printing often has a break-even between 250 and 2,000 parts before injection molding becomes a more viable option. With more lean inventory methods like just-in-time (JIT), 3D printing can be a replacement to molded components with limited on-hand needs.
