Data Runner

After a runner is configured and available for your project, your CI/CD jobs can use the runner. Specify the name of the runner or its tags in your `.gitlab-ci.yml` file. Then, when you commit to your repository, the pipeline runs, and the runner's executor processes the commands.

The Rails Command Line — Ruby on Rails Guides

Sales info on Amazon and iTunes shows that the new movie's hype triggered massive new interest in the Vangelis albums (The 1994 score release and the 2007 Blade Runner Trilogy release). Spotify's play indicators for the original Vangelis Blade Runner score are also sky high. It's good to see Vangelis's music re-exposed to a fresh audience.

Access Free Data Runner

Let's use some examples to explain how it work (assuming you have a working runner). Example 1: adding a data volume. A data volume is a specially-designated directory within one or more containers that bypasses the Union File System. Data volumes are designed to persist data, independent of the container's life cycle.
