If you want to see a personalized wallpaper on the tablet itself rather than on the lockscreen, you will need to install a more traditional launcher on the Kindle Fire HD. The home screen interface on the Kindle is a customized launcher, which is an app like anything else. By sideloading the APK for another free launcher onto your Kindle Fire, you can use a more traditional home screen launcher with your own wallpapers. You can change back to Amazon's customized home screen at any time.
