Female hunters of the early Americas | Science Advances

Sexual division of labor with females as gatherers and males as hunters is a major empirical regularity of hunter-gatherer ethnography, suggesting an ancestral behavioral pattern. We present an archeological discovery and meta-analysis that challenge the man-the-hunter hypothesis. Excavations at the Andean highland site of Wilamaya Patjxa reveal a 9000-year-old human burial (WMP6) associated

Bing: November 2013 Agricultural Science Paper

It is the duty of every employee to speak up about genuine concerns in relation to criminal activity, breach of legal obligation (including negligence, breach of contract, breach of administrative law, miscarriage of justice, danger to health and safety or environment) and the cover up of any of these in the workplace.

Migration of Chemical Compounds - Wiley Online Library

Food is produced and processed by millions of farmers and intermediaries globally, with substantial associated environmental costs. Given the heterogeneity of producers, what is the best way to reduce food's environmental impacts? Poore and Nemecek consolidated data on the multiple environmental impacts of ~38,000 farms producing 40 different agricultural goods around the world in a meta

The Japan Agri News | "THE JAPAN AGRI NEWS" is the English

Climate change could potentially interrupt progress toward a world without hunger. A robust and coherent global pattern is discernible of the impacts of climate change on crop productivity that could have consequences for food availability. The stability of whole food systems may be at risk under climate change because of short-term variability in supply. However, the potential impact is less

Using narratives and storytelling to communicate science

The typical American family, if it ever lived anywhere but on Norman Rockwell's Thanksgiving canvas, has become as multilayered and full of surprises as a holiday turducken — the all-American
